# US-2000 TRW-FD-J

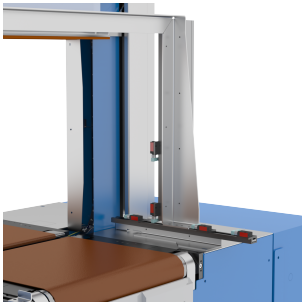

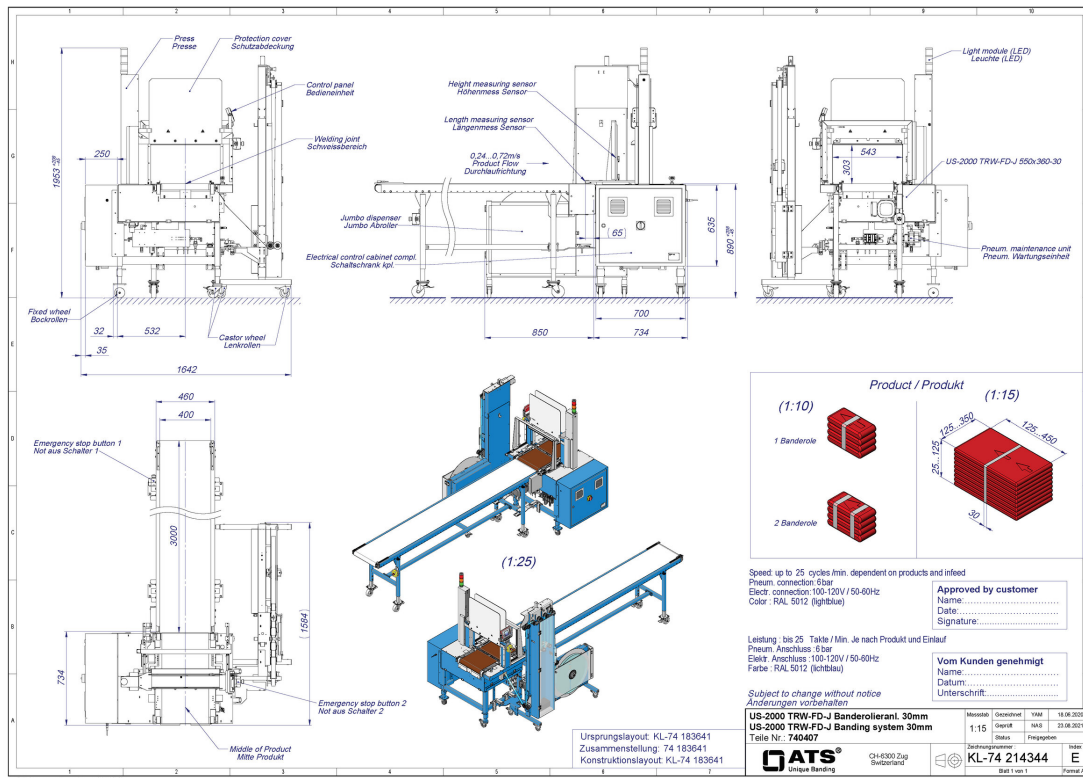

**ULTRASONIC**  
TECHNOLOGY 

The US-2000 TRW-FD-J is a fully automatic banding system for closing cardboard boxes, shipping boxes and similar products and is primarily used for e-commerce. Due to its small dimensions and modular design, it can be easily integrated into existing production and packaging lines. The US-2000 TRW-FD-J processes different product sizes without changeover and bands up to 25 products per minute. The banding system processes either paper or film banding with a width of 30 mm.

- ✓ *Automation of production and packaging lines*
- ✓ *Universally and flexibly applicable*
- ✓ *Processing of products of different sizes*
- ✓ *Easy integration in production line*
- ✓ *Ultra-Sonic Technologie*

The sensors in the infeed enable the processing of different products, which are banded once or twice depending on their size. The sensors can be adjusted manually.

## Technical specifications

### Max. cycles per Minute

25

### Bandwidth

30 mm

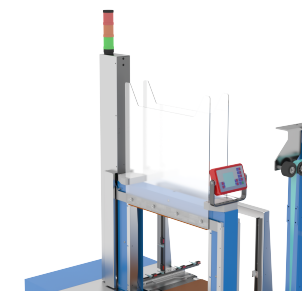

### Arch size

550 x 360 mm

### Air supply

6 bar

More information

The pneumatic hold-down behind acrylic glass panes enables precise belt guidance and eliminates the need for additional casing.
