

JenAct

**UV TORPEDO[®]
DUCT**

*Destroys biological and
chemical contaminants
as they pass through
the duct and drastically
improves the air quality.*

UV TORPEDO® DUCT

JenAct Limited specialises in UV Disinfection, UV Surface Sterilisation Systems and Microwave UV Technology, as well as new features, like Pulsed UV.

The UV Torpedo® Duct has been designed to achieve high log kills on airborne bacteria, viruses and moulds in air passing through HVAC and other air ducts.

Features Include:

- Consists of four high-output UVC lamps mounted on the custom designed polished aluminium reflector.
- Custom geometry maximises the amount of UVC available from the lamps
- Standard system requires about 1.8m straight section of the duct and comes with all required fittings
- Customised solutions are also available, contact us for more detail
