

JentonUV-C
Excellence in UV disinfection

n

JenAct specialises in UV disinfection systems of air and surfaces in food and pharmaceutical applications and HVAC systems.

JenAct UV disinfection devices help to:

- Decontaminate packaging
- Extend shelf life of food items
- Protect staff from airborne pathogens
- Reduce use of chemicals, waste and unwanted odours

JenAct products include:

- UV decontamination tunnels and UV disinfection conveyors
- GRU-V® Air Disinfection Devices for inactivation of indoor biological contaminants
- UV Torpedo® systems for air disinfection in HVAC ducts
- UV Crossbow™ systems for disinfection of HVAC evaporator coils
- Bespoke specialist UV systems for odour control
- Bottle disinfection devices

Jenton Group
Excellence in packaging and UV

INNOVATIVE, BESPOKE & SPECIALIST PRODUCTS

For over 50 years the Jenton name has signalled innovative automation equipment for food, medical, print and packaging industries.

- Banding • Bagging • UV Curing
- Vision • UV disinfection • Automation

Jenton Packaging

Excellence in banding and sealing

Jenton Banding machines provide the ideal solution for collating and branding. Ideal for currency, print, mailings, greetings cards, multipacks, promotions.

Jenton bag sealing systems offer high quality seals for pouches, food and dry goods bags, protective bagging and storage.

- Banding can be used for bundling, labelling, tamper evidence, shelf ready and more
- Bag sealing can be benchtop or conveyors, vacuum and gas flush
- Materials can be paper or film (now Plastic Free!)
- Benchtop or stand-alone – easy to install in the workplace
- Tamper evident and secure solutions for banding and bags
- Multiple band-width materials can be printed - graphics, logos, messaging, etc
- Rent or Buy

MINIMISE PACKAGING WITH A SIMPLE SOLUTION.

Jentonariana

Excellence in food packaging automation

Jenton Ariana designs and manufactures food packaging automation equipment including convergers, pad placers, seal testers, stackers and loaders. Jenton Ariana equipment in service around the world.

- All products are suited to washdown in food environments
- Latest HMIs with bespoke software make systems easy to set and use
- Ariana equipment will NOT be a line speed bottleneck
- Convergers to suit all thermoformers
- Convergers and Pad Placers available for OEM
- All machines optimised for minimum line length

JentonUV UV Curing

Excellence in ultraviolet based engineering

Jenton UV products include arc and LED lamp systems, UV conveyors, workstations, UV measurement systems and UV curable materials. Many items are designed and made in house and can accommodate bespoke requirements.

- UV curing of adhesives for medical and optical applications
- UV curing of coatings for glass, print and converting.
- Integrated UV measurement for process control
- Wide options available of UV sources
- Wide options available for UV wavelengths and intensities
- Calibration and Service departments
- Consultancy services
- In house test facilities and hire equipment available
