

Pouch and Bag Sealers

From Jenton International

Jenton

Jenton Group

since 1973

UK SME business based in
Whitchurch, Hants, UK

Specialising in the design,
manufacture, supply and
support of products for the
following industries;

- Packaging (Banding and Sealing)
- Food packaging automation
- UV Curing (industrial and medical)
- UV Disinfection (air and surface)
- Label and Data verification

Two brands - maximum options

These two ranges give every option from when a simple hand sealer is no longer enough. Many options from small bench top units to automated feed and fill systems. Dry goods, medical, and food.

PLEXPACK
Flexible Solutions. Certain Results.™

Emplex – by Plexpack (Canada)

Bench, floor standing, integrated bag sealers for individual bags and pouches.

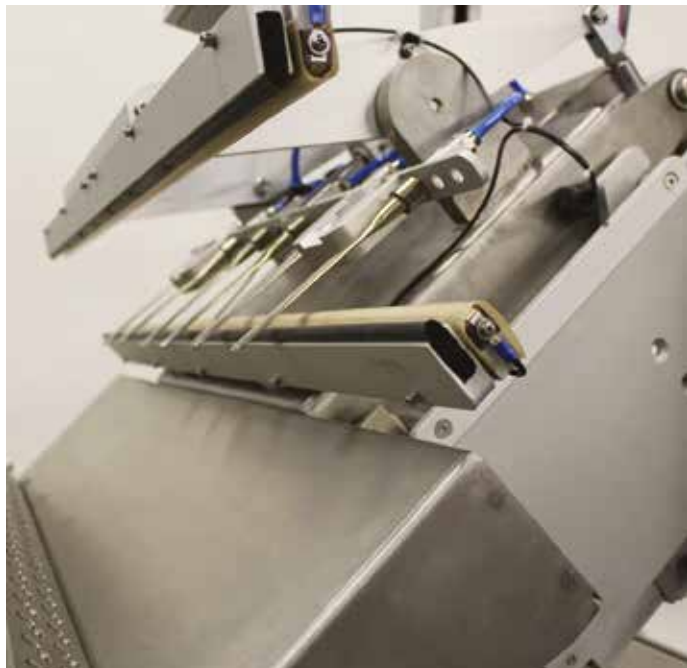

PRONOVA
PACKAGING SYSTEMS

Pronova (Sweden)

Inventors and innovators of the JOKER® concept.

Automatic bag feed for hand or automated filling.

VacPack – by Plexpack (Canada)

Static bench top and floor standing sealers for sealing of individual bags with vacuum and gas flush.

Emplex – by Plexpack (Canada)

Bench top and floor standing hand fed Continuous band sealers for bags and pouches. Vacuum and gas flush possible also (conveyorised for heavier items).

Pronova (Sweden)

In 1980, Pronova invented a unique packaging concept named JOKER®. Since then they have manufactured packaging machines and linked bags to create a cost efficient and automated packaging system.
